Dash 3.01 update now available for both students and teachers!

Students:

Dash Student Place has been updated with improvements to the Drawpad:

- There are new stamp tools available for shapes, number lines, grids, fraction strips, and tables. Each of these tools places the corresponding sizable stamp on a page.
- The equation editor has also been updated. It has been completely reworked to add many more sets of options for notation that were not available before.
- These new tools are accessible through the Tt Text icon.
